

# Pneumatic marking machine

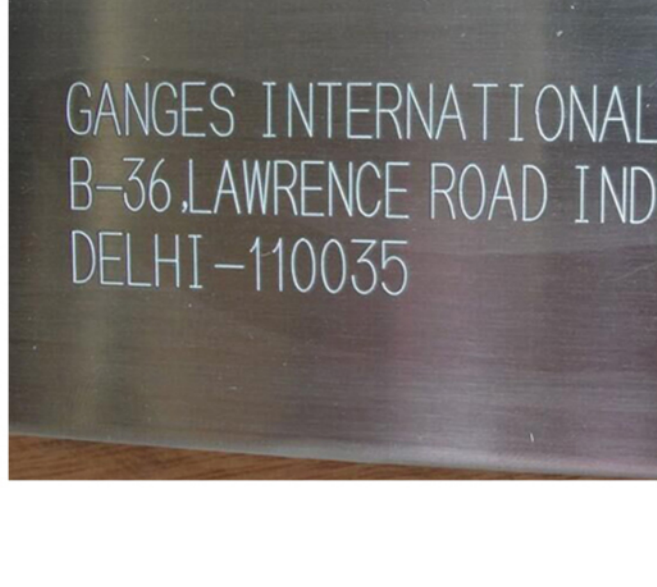

## Product parameters

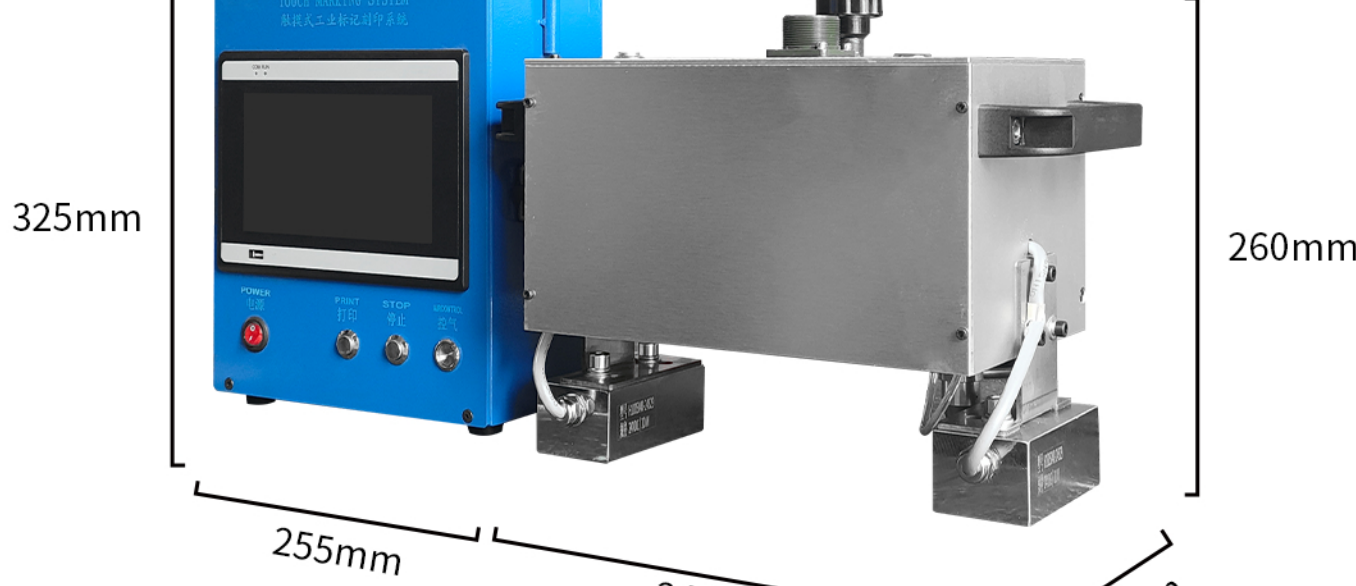

Marking depth	0.01-1.2MM
Marking speed	300次/秒
Marking range	150x80mm
Marking content	Characters; Numbers; Graphics
Material hardness	<HRC60
Needle hardness	>HRC85
Repeat accuracy	≤0.01mm
Gas source pressure	0.2-0.6mpa
Working voltage	AC220V 50Hz

## COMPANY INTRODUCTION

Chongqing Chuke Intelligent Machinery Equipment Co., Ltd. Our company specializes in pneumatic marking machines, electric marking machines, laser marking machines, laser cleaning machines, laser welding machines, laser cutting machines, and more. With nearly two decades of experience in the marking and laser industries, we have combined the development of modern intelligent automated factories to enable our products to interface with production management systems, ERP, or MES systems. This facilitates automatic marking, automatic welding, automatic cleaning, automatic cutting, and more. From accessory processing to intelligent automated assembly lines, we provide one-stop supporting services. Our products are widely used in industries such as aerospace, electronic components, metalworking machinery, auto and motorcycle parts, medical and pharmaceutical, cosmetics, and so on. These products are exported to countries and regions in North America, Europe, the Middle East, Southeast Asia, and beyond.
